

Grade One Family Day

"We Are Family!", that was the theme song for the culminating activity for the grade one unit on Family. Parents and family members joined our Grade One teachers and students to sing songs dance and enjoy good food. Many thanks to the direction of Ms. Katie, Mr. Doug, Mr. Joe and Ms. Kate for making it all happen.

The Continuation of Great Work

During the past two years the elementary teachers at Ruamrudee have been persistent in their role as educational leaders at the forefront of literacy. In these pictures we see our teachers continuing this great work after school and during early release days. Professional development, thanks to the direction of curriculum leaders, the Language Arts Committee and the significant dedication of our teachers has continued to ensure we are using the most effective practices for the teaching of literacy. A new report card developed last year that focuses on the benchmarks students achieve is one of the key items parents will notice. Classroom programs are supported strongly by the results attained from the DRA. Teachers meet as grade level teams for 80 minutes every four days to continue to refine and grow their teaching. Our focus this year is to continue to refine the report card and to purchase resources that will support our programs.

Hands on Science

Elementary students learn science by getting their hands on it. In a recent class students continued their work on classification, characteristics and identification by removing seeds from their favorite food. The fun part was that they were able to eat the "fruits" of their work.
